

Experiment 3

Course: 10060 Physics (Polytechnical Foundation), Spring 2026

Criteria	Level 1	Level 2	Level 3	Level 4
Can sketch an experimental setup.	There is no sketch of the experimental setup.	There is a sketch of the experimental setup but it is unclear in one or more ways.	There is a good sketch of the experimental setup with few minor issues of elements missing or being unclear.	There is a very good and clear sketch of the experimental setup.
Can explain the purpose and communicate the results of an experiment.	There is no attempt to explain and communicate the experiment.	Missing explanation or there is no attempt at communicating the experiment.	The purpose is described, the result is communicated but there are missing elements such as units.	Clear description of purpose, good communication of the experiment, and all measurements including units are present.
Can collect and represent data in a suitable manner.	Data is missing or not understandable.	Some important data are missing or are hard to understand. Data is not represented in a table or some other structured way.	All data have been collected and presented but the presentation is not entirely clear.	All data have been collected, organized and presented in a clear manner.
Can formulate a clear and testable hypothesis.	There is no hypothesis.	A hypothesis has been formulated but there are unclear points and/or the hypothesis is not testable.	A hypothesis has been formulated with unclear points but it is testable or there is a clear hypothesis but it is not testable.	A hypothesis has been formulated, and it is clear and testable.
Can judge the validity of the hypothesis based on the data/results.	There is no conclusion regarding the validity of the hypothesis.	The conclusion regarding the validity of the hypothesis is not supported by data/results.	The conclusion regarding the validity of the hypothesis is discussed/formulated unclearly.	The conclusion regarding the validity of the hypothesis refers to the data/results.
Reflections				
Here is an overall judgement based on elements not covered above.
